DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This firehouse, although constructed in 1949, is a revival of the Colonial style. It is a two story brick structure with a three tier tower. Over the three bays on the west end of the front is a pediment with a bullseye window. Just below is a cornice and ornamental frieze which extends across the front of the building. Four two story pilasters span the facade below, separating the bays. The door, centered below the pediment, has a round arch above and is flanked by pilasters. The tower is directly above these three bays. The first tier is made of brick with stone quoins embellishing the corners. There is a ballustrade with turned spindles around the upper edge of this tier. The second tier is made of wood and also has a ballustrade with turned spindles. Above this is an octagonally shaped tier with tall narrow arched openings. On the east half of the front, are three large round arched openings forming an arcade. These are the exits for the fire engines.

This 1938 photograph, taken from the roof of the Cambridge Armory, shows the Rescue Fire Company's equipment.

Mr. Spicer of the Baltimore News American photographed the "Queen Mary" during a test of its extension ladder on April 6, 1950.

Capt. Bruce Dean's livery stable was on Gay Street. In 1908 at the time this photograph was taken, Dean was the owner of several buses which connected the Hotel Dixon with all trains and boats that came to town.

This 1960 photograph shows the Cambridge Municipal Building which was erected in 1926. The building provides office space for the Cambridge Mayor and the clerk-treasurer and houses the Rescue Fire Company's equipment. From the author's collection

In 1916 members of the Rescue Fire Company proudly display a service truck. The picture was taken in front of the old fire hall on Gay Street which is now part of Johnson Motors.
